Physical optics

M. Ahles, T. Ruhl, G.P. Hellmann, H. Winkler, R. Schmechel and H.v. Seggern, Spectroscopic ellipsometry on opaline photonic crystals 1

Y. Xu, Two-grating interferometer for measurement of a step-surface altitude difference 9

A. Tonello, A.-D. Capobianco and G. Nalesso, Collision-induced polarization scattering of dispersion managed solitons 15

A. Lewis and I. Tikhonenkov, Noninterferometric phase calculation for paraxial beams using intensity distribution 21

B. Bêche, P. Papet, D. Debarnot, E. Gaviot, J. Zyss and F. Poncin-Epaillard, Fluorine plasma treatment on SU-8 polymer for integrated optics 25

P. Xie and T. Mishima, Fast switching of light propagation in a photorefractive crystal via Pockels effect 29

O. Korotkova and E. Wolf, Changes in the state of polarization of a random electromagnetic beam on propagation 35

H.F. Arnoldus and J.T. Foley, Highly directed transmission of multipole radiation by an interface 45

V. Tsoy, V. Belyaev, V. Misnik, D. Litovchenko and A. Tarasishin, Simulation of light propagation through birefringent substrates with periodical surface microrelief 57

R. Peng and D. Fan, Comparison between complex amplitude envelope representation and complex analytic signal representation in studying pulsed Gaussian beam 241

J. Chen, Fractional Fourier transform and spherical refracting imaging system 249

E. Carcolé, Diffraction theory of general nondiffracting beams generated with finite-aperture systems 255

Optical information and image processing

M. Amaya, A. Sharaiha and F. Ginovart, Comparison between co- and counter-propagative optical injection near the transparency wavelength on SOA static and dynamic performances 67

doi:10.1016/S0030-4018(05)0075-1

L. Chen, C. Quan, C.J. Tay and Y. Fu, Shape measurement using one frame projected sawtooth fringe pattern 275

L. Guo, H. Yu and L. Li, A new shared-path protection algorithm under shared risk link group constraints for survivable WDM mesh networks 285

W. Zheng, B. Liu, J. Bi and Y. Xu, Holographic associative memory by phase conjugate of four-wave-mixing in Sc:Fe:$LiNbO_3$ crystal 297

P.S. André and A.N. Pinto, Chromatic dispersion fluctuations in optical fibers due to temperature and its effects in high-speed optical communication systems 303

M.T. Caballero, P. Andrés, A. Pons, J. Lancis and M. Martínez-Corral, Axial resolution in two-color excitation fluorescence microscopy by phase-only binary apodization 313

Guided wave optics

C.-H. Yeh, H.-C. Chien, C.-C. Lee and S. Chi, Gain-clamping erbium-doped waveguide amplifier module using optical feedback technique 73

C.J.A. Bastos-Filho, J.F. Martins-Filho, M.T. Carvalho and A.S.L. Gomes, Measurements of gain cross-saturation and transient response in highly doped TDFAs 79

J.-C. Dung, Reflective type Raman amplification for loss compensation in dispersion compensating fiber 85

S. Fasquel, X. Mélique, O. Vanbésien and D. Lippens, Three-dimensional calculation of propagation losses in photonic crystal waveguides 91

C. Wang, Y. Leng, X. Liang, B. Zhao and Z. Xu, The application of achromatic phase matching in optical parametric chirped-pulse amplification 323

H.D. Zhu, Y. Ding, Z.Q. Cao and Q.S. Shen, Determination of near surface refractive index of graded-index waveguides based on surface plasmon resonance 331

M.-C. Oh, S.-H. Cho and H.-J. Lee, Fabrication of large-core single-mode polymer waveguide connecting to a thermally expanded core fiber for increased alignment tolerance 337

N.K. Efremidis and D.N. Christodoulides, Revivals in engineered waveguide arrays 345

H. Al-Raweshidy, H. Ali, S.S.A. Obayya, R. Langley and J. Batchelor, Stress–strain modelling and analysis of a piezo-coated optical fibre sensor 357

Y. Liu, Z. Yu, H. Yang, N. Zhang, Q. Feng and X. Zhang, Numerical optimization and simulation to wavelength-division multiplexing isolation filter consisted of two identical long period fiber grating 367

H.Y. Jaising and O.G. Hellesø, Radiation forces on a Mie particle in the evanescent field of an optical waveguide 373

A. Martínez-Rios, R. Selvas-Aguilar, I. Torres-Gómez, F. Mendoza-Santoyo, H. Po, A.N. Starodumov and Y. Wang, Double-clad Yb^{3+}-doped fiber lasers with virtually non-circular cladding geometry 385

A. Tonello, A.-D. Capobianco, G. Nalesso, F. Gringoli and C. De Angelis, Perturbations, internal modes and noise in dispersion-managed soliton transmission 393

Atomic and molecular physics

Y.-R. Chang, L. Hsu and S. Chi, Optical trapping of a spherically symmetric rayleigh sphere: a model for optical tweezers upon cells 97

E. Eremina, Y. Eremin and T. Wriedt, Discrete sources method for simulation of resonance spectra of nonspherical nanoparticles on a plane surface 405

Optical properties of condensed and soft matter

J. Bouclé, A. Kassiba, M. Makowska-Janusik, J. Sanetra, N. Herlin-Boime, A. Bulou and S. Kodjikian, Electro-optic phenomena in guest–host films of PMMA and SiC nanocrystals 415

K.S. Bindra, Influence of free carrier refraction due to linear absorption on Z-scan study of porous Si 421

L. Yonghua, W. Pei, Y. Peijun, X. Jianping and M. Hai, Negative refraction at the interface of uniaxial anisotropic media 429

Quantum optics

A.I. Kalachev, V. Pureur and D.N. Nikogosyan, Investigation of long-period fiber gratings induced by high-intensity femtosecond UV laser pulses 107

A. Luis, Scalar Wigner function for vectorial fields and spatial-angular Stokes parameters 437

P. Saari, M. Menert and H. Valtna, Photon localization barrier can be overcome 445

V. Peet and S. Shchemeljov, Sum-frequency generation and multiphoton ionization in spatially incoherent conical laser beams 451

Lasers and laser applications

C.A. Alonzo, W. Garcia and C. Saloma, Generation of optical-beam induced current via two-color (two-photon) excitation 117

L. Pei-li, H. De-xiu, Z. Xin-liang, C. Jun and H. Li-rong, Theoretical analysis of tunable wavelength conversion based on FWM in semiconductor fiber ring laser 123

O. Boyko, Th.A. Planchon, P. Mercère, C. Valentin and Ph. Balcou, Adaptive shaping of a focused intense laser beam into a doughnut mode 131

J. Cheng, A.Y.S. Cheng, Y.-h. He, H.-y. Zuo and J.-g. Yang, Enhancement of stimulated Raman scattering of CS_2 by using fluorescence of R6G 141

H.x. Ma, Q.h. Lou, Y.f. Qi, J.x. Dong and Y.r. Wei, 5.5 W CW Yb^{3+}:Y_2O_3 ceramic laser pumped with 970 nm laser diode 465
